DIPENDRA KUMAR THAKUR

Dipendra Kumar Thakur

I am passionate about **teaching** and mentoring students across various academic levels, including **Grades 9 and 10, as well as Classes 11 and 12**. My teaching approach focuses on simplifying complex concepts through clear explanations, practical examples, and student-centered learning. In addition to teaching **Mathematics and Physics**, I enjoy sharing my knowledge of surveying, GIS, and other geomatics-related subjects. I strive to create an engaging learning environment that encourages curiosity, builds confidence, and strengthens students' conceptual understanding.

PROFILE

+SUMMARY

Licensed Geomatics Engineer and 2026 graduate of the **Institute of Engineering, Pashchimanchal Campus, Tribhuvan University,** with practical exposure to GIS digitization, geospatial data processing, surveying, UAV photogrammetry, 3D modelling, and web-based mapping. Completed a final-year project integrating UAV-derived 3D building models, handheld LiDAR data, and a web-based augmented-reality campus visualization and navigation concept. Interested in applying reliable spatial data and modern geospatial technologies to mapping, infrastructure, land management, and decision-support projects.

+SKILLS

- GIS and spatial data management: QGIS, ArcGIS, Google Earth Pro, Google Earth Engine, OpenStreetMap tools
- Surveying and geomatics: field surveying principles, mapping, spatial measurement, geospatial data handling
- Remote sensing and photogrammetry: UAV image processing, Pix4D, structure-from-motion concepts, 3D reconstruction
- 3D and web mapping: point-cloud/3D-model workflows, Leaflet, HTML/CSS/JavaScript fundamentals, web-based map visualization
- Programming and technical tools: Python (basic), C, C++, MATLAB, Visual Studio Code
- Creative and communication tools: Canva, Filmora
- Professional strengths: analytical thinking, problem-solving, attention to detail, teamwork, adaptability, continuous learning.

ADRESS: - Bathanaha, Mahottari, Nepal

+LANGUAGE

- NEPALI
- HINDI
- ENGLISH

+PROFESSIONAL EXPERIENCE

GIS Digitizer Intern | NAXA Hub

- Contributed to a digitization project involving the identification, digitizing, and naming of buildings and roads from geospatial imagery and mapping sources.
- Supported the preparation and organization of spatial features with attention to consistency, completeness, and data quality.

Augmented Reality Visualization and 3D Building Modelling Using UAVs | Final-Year Project

- Developed a web-based campus visualization and navigation concept for Pashchimanchal Campus, Pokhara, combining UAV photogrammetry, handheld LiDAR data, 3D building models, and web technologies.
- Processed UAV imagery into photogrammetric outputs and worked with 3D model/point-cloud workflows; used Blender for model refinement and a web portal for visualization.
- Explored augmented-reality and map-based campus navigation using technologies including A-Frame, AR.js, Three.js, Leaflet, and OpenStreetMap-based services.
- Project output: https://dipendrathak.github.io/Final-year-prject-output/

Geomatics World Magazine | Research Publication

- Authored an article on Nepal GPS crustal deformation while pursuing the bachelor's degree.
- Article: https://dipendrathak.github.io/Portfolioo/Crop%20article.pdf

+EDUCATION

Bachelor's Degree in Geomatics Engineering | 2026

- Institute of Engineering (IOE), Pashchimanchal Campus, Tribhuvan University, Pokhara, Nepal.

High School

- Mithila Institute of Technology (MIT), Janakpur, Nepal.

Professional Status

Licensed Engineer (Geomatics Engineering).
